Dmitry Beskov

Frontend developer

Tbilisi, Georgia | dmitry.beskov@outlook.com | besdar.github.io

Work experience

JettyCloud (UCaaS) | 2022 - 2024

Senior Software Developer

- Contributed simultaneously with more than 4 teams (around 30 people) on more than 3 projects and received only positive feedback from my colleagues and supervisors alike during a performance review process
- Was noticed as one of the fastest employees in the team
- Was the author of more than 50 technical tasks designed to improve the performance and quality of the code
- Designed a centralized repository of technical interview questions and evaluation criteria, enhancing the recruitment process; this repository is now utilized by several teams to ensure consistency and quality in technical interviews
- Created a Chrome extension tool to generate test accounts, which made the daily work of both QA engineers and developers much easier

In this role, I was usually responsible for creating, updating and maintaining countless billing sub-modules for customer account pages and internal administration pages, enhancing user experience

Stack: TypeScript, React, Jest&RTL, Java&Kotlin, GraphQL

Foxford (EdTech) | 2021 - 2022

Frontend developer

- Started a code review process for the team, was an organizer of weekly frontend meetings
- Proposed many new rules to the ESLint to make it stricter in the project, integrated Stylelint, created code style guides for the team. As a result, the development process became faster and our product became more stable
- Enhanced the Rollup building script and configuration to deliver less data to our customers: implemented code splitting for production builds, CSS modules support, source maps and much more
- Improved our Lighthouse performance and SEO metrics by 30%, and started an epic task of moving from a 3rd party website builder to React template based development

Practically was a team leader (4 developers), worked a lot with HTML&CSS and performed managerial activities like teamwork process optimization on various development stages

Stack: JS&Flow, JQuery, HTML&CSS, React&Effector, NodeJS

Adsterra (AdTech) | 2020 - 2021

Frontend developer

- Was noticed as one of the fastest employees in our department
- Offered JS linter and Stylelint improvements and integration techniques, minification of JS and CSS; took active part in writing our frontend style guide; played a significant role in the refactoring process of our legacy code to modern syntax
- Successfully and confidently worked with PHP and PostgreSQL backends when the company was understaffed and needed a backend boost
- Was praised for being self-sufficient during the onboarding process

My main areas of work included the development of the advertising JS scripts, internal admin tools and the company's client account pages. Formerly I was employed at another company, but I worked on Adsterra's projects

Stack: JS, JQuery, HTML&CSS, PHP, PostgreSQL, React&Redux, Vue

BIOS (B2B, startup) | 2019 - 2020

Russian utility company | 2018 - 2019

Education

Saint Petersburg State Electrotechnical University | 2014 - 2018

Communication Technologies and Communication Systems

Faculty of Radio Engineering and Telecommunications
